

CARBON REDUCTION PLAN

September 2024

This Carbon Reduction Plan complies with the UK Public Procurement Notice (PPN) 06/21 and associated guidance for Carbon Reduction Plans.

Carbon Reduction Plan

Supplier name: Intra Medikal Gereçler Pazarlama LTD.ŞTİ

Publication date: 02/09/2024

Commitment to achieving Net Zero

Intra Medikal Gereçler Pazarlama LTD.ŞTİ is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024

Baseline year emissions

Emissions	Total (tCO ₂ e)
Scope 1	59.95 tCO ₂ e
Scope 2	5.80 tCO ₂ e
Scope 3	37.33 tCO ₂ e
Total Emissions	103.08 tCO₂e

Current Emissions Reporting

Reporting Year: 2024

Emissions	Total (tCO ₂ e)
Scope 1	59.95 tCO ₂ e
Scope 2	5.80 tCO ₂ e
Scope 3	37.33 tCO ₂ e
Total Emissions	103.08 tCO₂e

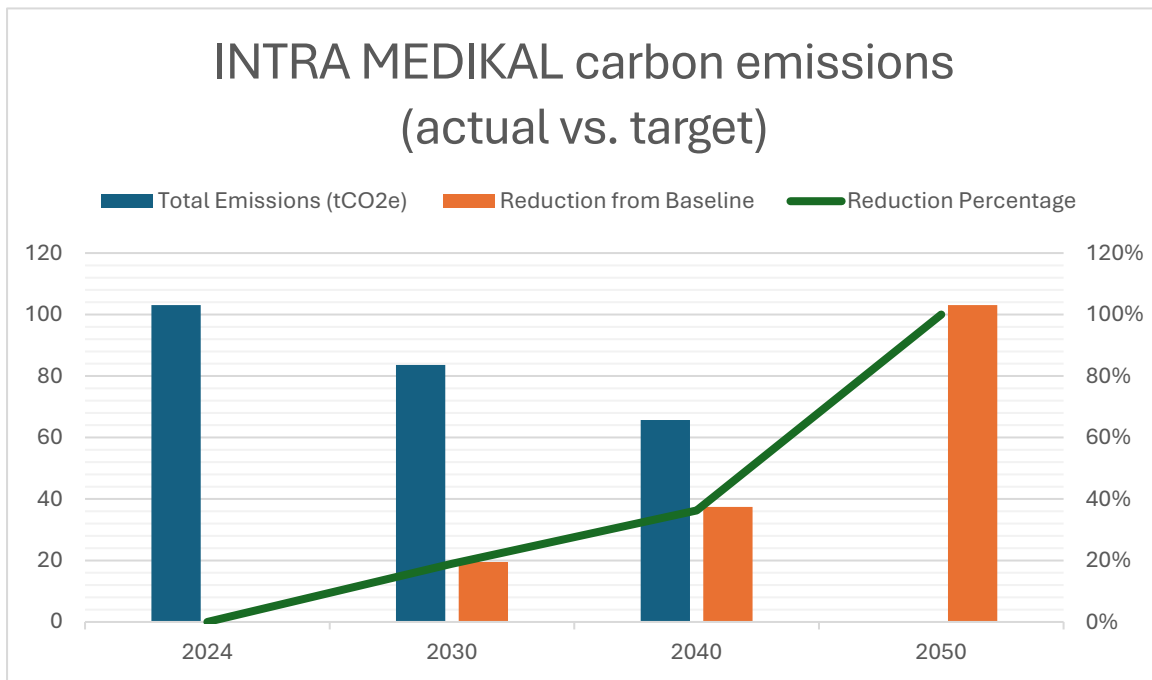

Emissions reduction targets

To continue our progress towards achieving Net Zero, we have adopted the following carbon reduction targets:

We project that carbon emissions will decrease over the next six years, reaching 83.60 tCO₂e by 2030. This represents a reduction of 18.9% compared to current levels.

Progress against these targets can be seen in the graph below.

Year	Total Emissions (tCO ₂ e)	Reduction from Baseline	Reduction (%)
2024	103.08 tCO ₂ e	0 tCO ₂ e	0%
2030	83.60 tCO ₂ e	19.48 tCO ₂ e	18.9%
2040	65.67 tCO ₂ e	37.41 tCO ₂ e	36.3%
2050	0 tCO ₂ e	103.08 tCO ₂ e	100%

Carbon Reduction Projects

Carbon Reduction Initiatives 2024-26

The following environmental management measures and projects have been initiated since the 2024 baseline:

1. Implemented an energy efficiency programme in our office, including LED lighting upgrades and smart thermostats, reducing electricity consumption by approximately 10%.
2. Initiated a recycling programme, currently recycling 0.5-1 tonne of waste annually.
3. Conducted employee awareness training on energy conservation and sustainable practices.

Future Carbon Reduction Initiatives

In the future we plan to implement further measures such as:

1. Gradually transition to renewable energy sources for our office electricity needs, aiming for 30% renewable energy use by 2030. This will include:
 - Researching and selecting energy providers that offer renewable energy options
 - Gradually increasing the proportion of renewable energy in our electricity mix

- Considering on-site renewable energy generation where feasible
2. Implement a sustainable travel policy to reduce business travel emissions by 20% by 2028 through increased use of video conferencing and prioritizing rail over air travel for domestic trips.
 3. Improve vehicle fleet efficiency by replacing 25% of our petrol vehicles with hybrid or electric models by 2030.
 4. Enhance building energy efficiency through improved insulation and installation of energy-efficient heating and cooling systems, targeting a 15% reduction in energy use by 2030.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
